

Product

The new RAPTOR-GAMING M2 combines a total new mouse concept.

The resolution of the optical mouse can be set with a hardware button in steps from 400 dpi up to 2400 dpi. In doing so also the fastest „moves“ in games will be realized with an acceleration of up to 20g. For optimum settings to the personal needs of the individual gamer the weight of the RAPTOR-GAMING M2 can be adjusted with exchangeable weights to 110, 120 or 130 gram. But not enough with the gimmicks.

The innovative finger-wing on the right-bottom side of the mouse together with the ergonomical right-hand user design and the special soft-touch-surface prevent your fingers to slip off. Additional features of the elegant looking, mat-black mouse are the two extra sets of mouse-sliders and a 2,5 m long, flexible USB cable.
